BTC is skyrocketing and alts are looking bullish. It's the right time to invest and here's our altcoins list for December. Five of our picks from [November's List](#) (\$Sys, \$Trig, \$Strat, \$Steem and IOTA) hit sell targets. IOTA especially did 400% growth last month. As successful as the November list was, we still suggest you do secondary research on these coins before making a decision to buy in. We are bullish about low cap coins for this month.
